Summary of Loading from 4 Mines - July vs August 2015.docx

Robert B. Brobst, P.E.

Senior Environmental Engineer

U.S. E.P.A. Region 8

1595 Wynkoop Street

Denver Colorado

303-312-6129 (office)

“It is a capital mistake to theorize before one has data. Insensible one begins to twist facts to suit theories, instead of theories to suit facts.” Arthur Conan Doyle’s A Scandal in Bohemia (1891)

“ The Good thing about science is that it’s true whether or not you believe in it.” Neil deGrasse Tyson

Subject: Loading Evaluation

Please see the attached loading comparison for the 4 mines near the Gold King: Mogul, Red and Bonita, Gold King, and American Tunnel. The attached document compares concentrations, flow, and loading on July 22, 2015 to those on August 22, 2015. I am completing the comparison to historic values and will send that when it is available, hopefully later this afternoon.

Please let me know if you have questions, comments, or changes. Additional information is available, I just tried to pull the most pertinent items.

Jan
